## Appendices

- **Appendix A**  State of Washington – Required Forms  81
- **Appendix B**  List of Training Subjects  91
- **Appendix C**  Hazard Assessment Checklists  93
- **Appendix D**  Hazard Assessment and Correction Record  94
- **Appendix E**  Employee Acknowledgement Form  96
Section 1

General Instructions

1. Overview

Industrial injuries create a no-win situation for everyone involved. Employees experience pain, suffering and incapacitation while the company suffers from the loss of the injured person's contributions. This Accident Prevention Program is designed to assist all personnel in assuring that such an undesirable situation will not develop in this company. It provides information and guidance for the establishment and maintenance of an injury-free work environment.

2. Procedures

This Accident Prevention Program contains guidance for safety procedures to be followed and forms to be used. Supervisors are expected to integrate the procedures into the appropriate work activity and employees are expected to apply them on the job. The sample forms are to be used if they apply to the job concerned.

3. Dissemination

A copy of this statement will be issued to all supervisory and management personnel. A copy of the policy statement will be posted on company safety and health bulletin boards and at the following locations:

 ➔ DECISION POINT – Enter bulletin board location(s) here
Section 2

Safety Policy Statement

1. **Program Policy Statement**

XYZ Company shall comply with all occupational safety and health laws and regulations of the State of Washington.

To accomplish this, we must constantly be aware of unsafe acts and conditions in all work areas that can produce injuries. No employee is required to work at a job they know is not safe or healthful.

As employees of XYZ Company, your cooperation in detecting hazards and, in turn, controlling them, is a condition of your employment. Inform your supervisor immediately of any situation beyond your ability or authority to correct.

2. **Program Requirement**

The Accident Prevention Program is required for all construction companies doing business within the State of Washington.

This program complies with Washington Administrative Code (WAC) 296-800-140.

Proper use of this program requires the Program Administrator to carefully review the requirements for each of the program sections, appendices and to modify, where necessary, to accurately reflect specific company requirements as it relates to its operation and workforce.

This program must be maintained by the employer in order to be effective.
Section 3

Assignment of Responsibilities

Safety and Health Responsibilities

XYZ Company is responsible for ensuring that all onsite and offsite work activities, equipment, and facilities operated or maintained by XYZ Company or our subcontractors or suppliers conform fully with safety and health regulations promulgated by the U.S. Department of Labor in Title 29 CFR 1910 and 1926, Occupational Safety and Health Act of 1970, and provisions of all state approved plans and safety procedures. Compliance shall include the aforementioned regulations, standards and codes and all such regulations, standards and codes as included by reference. These responsibilities include, but are not limited to, the following:

1. **Program Administrator**

   Written Accident Prevention Program administrator, Program Administrator has the authority and responsibility for implementing the provisions of this program.

   ➔ DECISION POINT – Enter a name or position title (recommended)

   The Program Administrator for XYZ Company is ________________________________.

2. **Safety Representative Responsibilities**

   The company safety representative, Safety Representative also has the authority and responsibility for implementing the provisions of this program and be the same person or title as the Program Administrator.

   ➔ DECISION POINT – Enter a name or position title (recommended)
Section 4

Employee Compliance & Discipline

1. Employee Compliance

OSHA requires that you include a system for ensuring that employees comply with safe and healthful work practices.

Substantial compliance with this provision includes recognition of employees who follow safe and healthful practices, e.g., incentive programs, training and retraining programs, disciplinary actions, infraction notices; or any other means that ensure employee compliance with safe and healthy work practices. Though sample procedures are provided, you must modify them to suit your requirements.

As part of this compliance, you should provide employees with a code of safe practices that reflect your company's specific operations more exactly. The Code of Safe Practices we have provided is a suggested format.

2. Employee Enforcement Procedures and Systems

The XYZ Company safety rules and work procedures shall be practiced and enforced.

We have established a system to ensure that violations of rules are dealt with fairly but firmly, that all employees are aware of the requirements, and that reorientation or retraining may be provided when needed. Incentive programs may be initiated and will be used in conjunction with a good enforcement program.

Discipline

No safety program can be effective without some form of discipline. There are no rules that must be followed, only guidelines.
Section 5

Procedure for Occupational Injury and Illness

➤ DECISION POINT - Customize this section by adding any additional responsibilities and deleting those that may not apply to your company.

A. Owner or lead person immediately takes charge

1. Supervise and administer first aid as you wish (Good Samaritan Law applies).
2. Arrange for transportation (ambulance, helicopter, company vehicle, etc.), depending on the seriousness of the injury. Protect the injured person from further injury.
3. Notify owner or top management, if not already present.
4. Do not move anything unless necessary, pending investigation of the incident.
5. Accompany or take injured person(s) to doctor, hospital, home etc. (depending on the extent of injuries).
6. Take injured person to family doctor, if available.
7. Remain with the injured person until relieved by other authorized persons (manager, EMT, doctor, etc.).
8. When the injured person’s immediately family is known, the owner or supervisor should properly notify family members, preferable in person, or have an appropriate person do so.
Section 6

Accident Investigation and Reporting

➤ DECISION POINT - If this investigation system is not in place, it must be created.

Accident Investigation and Reporting

A system must be established for investigating all workplace accidents, near misses, injuries and illnesses. Someone who can identify the causes and recommend corrective actions should complete the investigation system. It is important to keep records of accident investigations. They can help to determine the types of accidents that occur, where they happen, their causes and any accident trends. Such information is invaluable in preventing future accidents and may also help reveal flaws in operating procedures.

1. Program Introduction

At XYZ Company accident investigation is an integral part of our total occupational safety and health program. It is especially important as a means to determine root causes, document facts, provide information on costs, and promote safety.

All serious occupational injuries and illnesses shall be thoroughly investigated by the Safety Representative with the underlying goal of preventing recurrence.

Whenever there is an incident that results in death or serious injuries that have immediate symptoms, a preliminary investigation will be conducted by the immediate supervisor of the injured person(s), a person designated by management, an employee representative of the safety committee, and any other persons whose expertise would help the investigation.
Section 7

Safety Bulletin Board

➤ DECISION POINT - Customize this section by adding any additional information.

Purpose

A. To increase employee's safety awareness and convey the company's safety message. If a proper place can be found for a bulletin board, this is a good tool.

B. The following items are required to be posted:

1. WISHA poster (F416-081-00)
2. Industrial Insurance poster (F242-191-000)
3. Wage and hour laws (F700-053-000)
4. Citations and Notices (if a Citation and Notice is received, it must be posted until all violations are abated.)
5. Emergency Telephone Number Posted (as appropriate)
6. OSHA 300 Summary (required February 1 thru April 30 of each year)

C. Suggested Items:

1. Safety and health posters
2. Minutes of crew/leader safety meetings
3. Date, time, and place of next safety meeting
4. Information about any recent incidents
5. Safety awards/employee recognition
6. Hazard communication information
7. Pertinent safety concerns, news clippings and other off-the-job items that may be of significant importance to employees.
Section 8

Medical and First Aid Procedures

Medical and First Aid

1. Each XYZ Company construction office shall be equipped with a standard first aid kit suitable for the size of the workforce. Additional first kits may be strategically positioned throughout the workplace and/or job site. The location of each kit will be communicated to all employees and shall be clearly marked “First Aid.”

2. Vehicle size first aid kits shall be maintained in each XYZ Company construction/project-use vehicle.

3. All first aid supplies shall be inspected at least monthly and replenished as required.

4. Accident / Injury reporting: All accidents, near miss incidents and injuries shall be reported to XYZ Company Safety Representative. Following an injury:

   A. The employee’s injury will be evaluated and first aid rendered.
   
   B. If the injury requires medical attention the employee will be escorted to the onsite clinic. Further evaluation and treatment will be rendered.

   Note: In the event of a life threatening emergency contact 911 for emergency medical assistance.

   C. A determination will be made by XYZ Company site supervision and safety representative as to whether or not the injured, and any other involved are to be drug tested. Usually a post-accident drug test is required.

   D. An Employer’s Initial Report of Industrial Injury, Accident and Property Damage form (as directed by your State) will be completed for all injuries requiring medical attention, even if only first aid, when rendered at either an onsite clinic or outside medical facility.

   E. A supervisor’s report or Statement of Injury will be completed by the employees’ supervisor.
Section 9

Safety Committee and Meetings

➔ DECISION POINT - If a Safety Committee is not established state reason.

1. Safety Committee

XYZ Company has formed a safety committee to help employees and management work together to identify safety problems, develop solutions, review incident reports and evaluate the effectiveness of our safety program. The committee is made up of management-designated representatives and employee-elected representatives.

A. The committee shall:

1) Promote a safe and healthy work environment at all times.
2) Encourage communication between employees and management.
3) Serve as an oversight committee on all issues relative to safety and health.
4) Make recommendations to the Safety Representative.

B. Functions: The committee has four principal functions:

1) Identify potential hazards;
2) Evaluate these potential hazards;
3) Recommend corrective action; and
4) Follow up implemented recommendations.

To carry out its functions, the committee is required to hold meetings and carry out regular inspections of the workplace

C. Membership
Section 10

Inspection and Hazard Control

1. Eliminating Workplace Hazards

XYZ Company is committed to eliminating or controlling workplace hazards that could cause injury or illness to our employees. We will meet the requirements of state safety standards where there are specific rules about a hazard or potential hazard in our workplace. Whenever possible we will design our facilities and equipment to eliminate employee exposure to hazards. Where these engineering controls are not possible, we will write work rules that effectively prevent employee exposure to the hazard. When the above methods of control are not possible or are not fully effective we will require employees to use personal protective equipment (PPE) such as safety glasses, hearing protection, foot protection etc.

2. Safety Rules and Work Procedures

A. General Safety Rules

The XYZ Company Written Safety and Health Program apply to all employees.

The rules may be very simple or extremely complex, depending on the nature of the work processes and the number and kinds of employees involved. Some items that are addressed by general safety rules are:

1) Personal protective equipment requirements;
2) Clothing appropriate for the work;
3) Behavior expected of all employees;
4) How to leave the workplace safely, with particular reference to emergency procedures; and
Section 11

Codes of Safe Practices

Construction Industry

1. All persons shall follow these safe practices rules, render every possible aid to safe operations, and report all unsafe conditions or practices to the supervisor or superintendent.

2. Supervisors or foremen shall insist on employees observing and obeying every applicable Company, State or Federal regulation and order as is necessary to the safe conduct of the work, and shall take such action as is necessary to obtain compliance.

3. All employees shall be given frequent injury and illness prevention instructions. Instructions shall be given at least every 10 working days.

4. Anyone known to be under the influence of drugs or intoxicating substance which impair the employee’s ability to safely perform the assigned duties shall not be allowed on the job while in that condition.

5. Horseplay, scuffling, and other acts which tend to have an adverse influence on the safety or well-being of the employees, shall be prohibited.

6. Work shall be well planned and supervised to prevent injuries in the handling of materials and in working together with equipment.

7. No one shall knowingly be permitted or required to work while the employee’s ability or alertness is so impaired by fatigue, illness, or other causes, that they might unnecessarily expose the employee or others to injury.

8. Employees shall not enter manholes, underground vaults, chambers, tanks, silos, or other similar places that receive little ventilation unless it has been determined that it is safe to enter.

9. Employees shall be instructed to ensure that all guards and other protective devices are in proper places and adjusted, and shall report deficiencies promptly to the supervisor or superintendent.

10. Crowding or pushing when boarding or leaving any vehicle or other conveyance shall be prohibited.
Section 12

General Construction Safety Rules

1. Always store materials in a safe manner. Tie down or support piles if necessary to prevent falling, rolling, or shifting.
2. Shavings, dust scraps, oil or grease should not be allowed to accumulate. Good housekeeping is a part of the job.
3. Trash piles must be removed as soon as possible. Trash is a safety and fire hazard.
4. Remove or bend over the nails in lumber that has been used or removed from a structure.
5. Immediately remove all loose materials from stairs, walkways, ramps, platforms, etc.
6. Do not block aisles, traffic lanes, fire exits, gangways, or stairs.
7. Avoid shortcuts – use ramps, stairs, walkways, ladders, etc.
8. Standard guardrails must be erected around all floor openings and excavations must be barricaded. Contact your supervisor for the correct specifications.
9. Do not remove, deface or destroy any warning, danger sign, or barricade, or interfere with any form of protective device or practice provided for your use or that is being used by other workers.
10. Get help with heavy or bulky materials to avoid injury to yourself or damage to material.
11. Keep all tools away from the edges of scaffolding, platforms, shaft openings, etc.
12. Do not use tools with split, broken, or loose handles, or burred or mushroomed heads. Keep cutting tools sharp and carry all tools in a container.
13. Know the correct use of hand and power tools. Use the right tool for the job.
14. Know the location and use of fire extinguishing equipment and the procedure for sounding a fire alarm.
15. Flammable liquids shall be used only in small amounts at the job location and in approved safety cans.
16. Proper guards or shields must be installed on all power tools before use. Do not use any tools without the guards in their proper working condition. No “homemade” handles or extensions (cheaters) will be used!
• All ladders must be equipped with safety (non-skid) feet.

• Portable ladders must be used at such a pitch that the horizontal distance from the top support to the foot of the ladder is about one-quarter of the working length of the ladder.
Excavation and Trenching

The presence of ground water requires special treatment

Solid rock and compact shale (90°)

Original ground line

square foot

nts = ton per square foot

1. Walkways or bridges with standard railings must be provided when employees or equipment are required to cross over excavations.
2. The walls and faces of all excavations in which employees are exposed to danger from moving ground must be guarded by a shoring system, sloping of the ground, or some other equivalent means.
Section 13

Company Required Safety Programs

Due to the nature of work and operations performed by XYZ Company, it is necessary that the following regulatory programs are included in our Injury and Illness Prevention Program:

For convenience, programs listed in the table below are alpha sorted.

➔ DECISION POINT – Review and select those programs that apply or included others not listed

Company Required
Safety Forms & Checklists

Due to the nature of work and operations performed by XYZ Company, it is necessary that the following safety forms and checklists are included in our Injury and Illness Prevention Program:

For convenience, forms listed below are subject sorted.

**DECISION POINT** – Review and select those forms that apply or included others not listed

**CONFINED SPACE**
- Confined Space Entry Permit
- Confined Space – Class A & B Permit
- Confined Space – Class C Permit
- List of Authorized Entrants
- Permit Required Confined Space – Inventory Log

**CONSTRUCTION INDUSTRY - SAFETY MANAGEMENT**
- Construction Industry Inspection Checklist
- Job Start-Up Checklist
- Contractors Job Site Checklist
- Contractor Safety Performance Report
- Construction Equipment Checklist
- Forklift Service Checklist
- Operator Performance Evaluation Checklist
- Safety Nets Inspection Checklist
- Body Harness & Lanyard Inspection Report
- Competent Person Evaluation – Fall Protection

**CRANE OPERATIONS**
- Cranes, Derricks or Material Handling Devices Worksheet
- Crane Inspection Checklist
- Crane Pre-Lift Checklist
- Sling (Chain) Inspection Report
- Monthly Hoist Rope Inspection Report
- Monthly Hoist Hook Inspection Report

**EMERGENCY ACTION AND RESPONSE**
- Crisis Management Response Team - Contact Log
- Safety Representatives - Contact Log
- External Resources – Contact Log
- Vulnerability Analysis Chart
- Bomb Threat Checklist
- Employee Evacuation - Accounting Log
- Physically Challenged – Employee List
- Command Post Equipment Inventory Log
- Press Information Log
- Post Exercise Evaluation Report
# EMPLOYEE SAFETY RECORDS

- Employee Acknowledgement Form
- Employee Orientation Checklist – Construction
- Employee PPE Assessment Form
- Employee PPE Issue Form
- Employee Safety Training Record
- Ergonomic Workstation Analysis Form
- Employee Ergonomic Workstation Questionnaire
- Employee Safety Suggestion Form

# EXCAVATION OPERATIONS

- Pre-Excavation Checklist
- Trenching Design Checklist
- Trench Safety – Daily Field Report
- Competent Person Evaluation – Excavation

# FIRE PREVENTION

- Hot Work Permit
- Fire Safety Inspection Checklist
- Fire Drill Post Response Report
- Emergency HAZMAT Inventory Log
- Hazardous Waste Disposal Request Form

# GENERAL INDUSTRY – SAFETY MANAGEMENT

- General Industry Safety Inspection Checklist
- Office Safety Inspection Checklist
- Job Safety Analysis Worksheet & Instructions
- Accident Prevention Program Analysis
- Forklift Service Checklist
- Hearing Conservation Program Log
- Scaffolding Safety Checklist
- Site Safety Meeting Record
- Supervisors Monthly Meeting Record
- Report of Safety Hazard Form
- Property Security Survey

# INCIDENT REPORTING FORMS

- OSHA 300 Log
- Employee Injury & Illness Report
- Employee Injury Cost Accounting Matrix
- Vehicle Accident & Property Damage Report
- Compiling Direct and Indirect Costs

# OCCUPATIONAL HEALTH FORMS

- Medical Evaluation Questionnaire – Respirator Use
- Respirator Fit Testing Record
- Hepatitis B Vaccine - Accept/Decline Form
- Bloodborne Pathogens Risk Classification Flowchart
- BBP Employee Annual Training Record
- BBP Source Patient Consent Form

# RADIATION PROGRAM FORMS

- Radioactive Material Use Log
- Pregnancy Declaration Form
- Laboratory Contamination Survey Record
- Radiation Producing Device - Authorization Form
- Training Guide for Radiation Workers
- Training Guide for Ancillary Radiation Works

# TRAINING RECOGNITION CERTIFICATE

- Certificate of Completion

Hazard Assessment Checklist

➤ DECISION POINT – Determine which checklists apply to your operation and delete all others

XYZ Company has determined the following hazard assessment checklists apply to its operations:

1. Abrasive Wheel Equipment Grinders
2. Compressed Air Receivers
3. Compressed Gas & Cylinders
4. Compressors & Compressed Air
5. Confined Spaces
6. Control of Harmful Substances by Ventilation
7. Crane Checklist
8. Electrical
9. Elevated Surfaces
10. Emergency Action Plan
11. Environmental Controls
12. Ergonomics
13. Exit Doors
14. Exiting or Egress
15. Fire Protection
16. Flammable & Combustible Materials
17. Floor & Wall Openings
18. Fueling
19. General Work Environment
20. Hand Tools & Equipment
21. Hazardous Chemical Exposures

22. Hazardous Substances Communication
23. Hoist & Auxiliary Equipment
24. Identification of Piping Systems
25. Industrial Trucks – Forklifts
26. Infection Control
27. Lockout-Tagout Procedures
28. Machine Guarding
29. Material Handling
30. Noise
31. Personal Protective Equipment & Clothing
32. Portable (Power Operated) Tools & Equipment
33. Portable Ladders
34. Powder Actuated Tools
35. Sanitizing Equipment & Clothing
36. Spraying Operations
37. Stairs and Stairways
38. Tire Inflation
39. Transporting Employees & Materials
40. Ventilation for Indoor Air Quality
41. Walkways
42. Welding, Cutting & Brazing
